

# What's Stopping Your Studio?

Use Shotgun Software for production management with your favorite Autodesk M&E tools to free up creativity, speed up progress, and unleash a more powerful pipeline.

Collaboration is broken

## Coordinate teams, tasks, and assets

Shotgun allows for faster, easier development of workflows for each project. Improve the flow of information with permissions-based access and maximize the efficiency of the entire team.

Task switching is toxic

## Keep artists creating

Integrate with the industry's best tools and technology and allow artists to work in their favorite apps without ever leaving Shotgun. Nurture creativity and empower innovation by helping artists focus on what they love.

Resources are limited

## Understand and use the data

Improve project planning and assembling, and accurately track staffing, tasks, budgets, assets, and milestones. Shotgun helps optimize resources and protect profit margins in real time.

Work volume is overwhelming

## Easily and quickly scale the team

With Shotgun, you can easily adapt to the needs of the market without adding chaos or confusion. Outsource to a global workforce and connect the whole team in the cloud.

Competition is fierce

## Deliver on time and on budget

Maximize your studio's efficiency to minimize the drama. Shotgun puts the focus on the work by connecting everyone on the same platform and improving communication.

Projects, tasks, and assets are a mess

## Simplify with the industry standard

Attract and retain the industry's best talent by adopting Shotgun's industry standard workflows and systems. Boost productivity with a common protocol and watch your studio thrive.

## Keep it flowing

Autodesk M&E is your partner in design, making solutions that supercharge innovation in VFX and animation. By setting industry standards in production management, Shotgun Software helps you get more from **3dsMax**, **Maya**, **Flame**, and **Motionbuilder**.
